CHAD M. MAUGHAN

Principal Engineer

PROFILE

I'm a well-rounded individual with over a decade of experience leading teams that quickly and efficiently ship powerful and innovative solutions.

I'm passionate about all aspects of software development, from developing native mobile and HTML5 client applications to architecting frameworks and RESTful APIs that scale on the backend. I'm intellectually curious and am always learning new languages and concepts.

I completed my M.S. in Computer Science focusing my research on applying combinatorial testing practices to rich web applications.

EXPERIENCE

Domo, 2013–Present

Principal engineer and team lead. Previous focus on data ingestion, API, and developer portal. Current effort leading alerting, data analytics, and ML platform.

LDS Church, 2011–2013

Lead of "Stack team" (internal consulting, training and technology advocacy). Preceding position of solution architect of sensitive projects for senior leadership.

Christopherson Business Travel, 1999–2011

Manager of development team, lead developer and architect. Contributor to rapid growth from 20 million (1998) to 260 million (2010) USD in annual revenue.

EDUCATION

Dec. 2012 **M.S., Computer Science**, GPA 3.5
Utah State University

Dec. 2005 **B.S., Computer Science**, *Cum Laude*
Weber State University

PUBLICATIONS

INTRODUCTION TO COMBINATORIAL TESTING
Rich Web Applications Chapter
National Institute of Standards and Technology
D. Richard Kuhn, et. al, June 2013

SKILLS

- › 10+ years of extensive Java experience with **Tomcat**, **Spring Boot**, **Hibernate**, **AspectJ**, building and consuming **SOAP** and **REST** APIs.
- › **GIAC** Secure Software Programmer Java Certified
- › Client-side familiarity: **JavaScript**, **CSS**, **HTML5**, **React**, **AngularJS**, **d3.js**, **Grunt**, and **Node.js**.
- › Polyglot development experience: **Julia**, **R**, **C#**, **Ruby**, **Python**, and **PHP**.
- › **DevOps** with **Linux**, **Amazon Web Services**, and **Kubernetes**.
- › Utilities such as **Git**, **sed**, **awk**, **vi**, and **L^AT_EX**.
- › Limited experience with **Android** and **iOS**.
- › Strong with RDMS systems **Postgresql**, **MySQL**, and **Oracle**, and noSQL solutions **CouchDB**, **MongoDB**, and **Neo4j**.
